

MEMORANDUM

TO: SLDMWA Board of Directors, Alternates

FROM: John Brodie, Water Resource Programs Manager
Joe McGahan, Regional Drainage/Westside Watershed Coalition Coordinator

DATE: May 12, 2022

RE: Activity Agreements – Staff Report for April 2022

This memorandum serves as the Staff Report for April 2022 regarding specified¹ Water Authority activities not separately addressed on the Board meeting agenda.

1. Integrated Regional Water Management (IRWM) Activity Summary

San Joaquin River Funding Area (SJRFA)

Work continues on the Proposition 1, Round 1 grant project. We are waiting for the release of the final Guidelines and Proposal Solicitation Package for Proposition 1, Round 2 funding. Under an agreement between IRWM Regions in the SJRFA, the Westside San Joaquin Region is eligible for up to \$955,000 for projects in SJRFA. DWR could begin accepting applications in August.

Tulare-Kern Funding Area (TKFA)

\$14.4 Million will be available for IRWM regions in the TKFA for the Proposition 1, Round 2 solicitation and application. IRWM regions in the funding area have yet to decide how the funds will be split across the region.

General Westside-San Joaquin Integrated Regional Water Management Plan (IRWMP)

SLDMWA Staff is working with project proponents in both funding areas to refresh the Opti database of projects. The updated project list will be used to inform project selection for the Proposition 1, Round 2 solicitations in late summer/early fall.

Staff also continues work on a project to engage with Disadvantaged Communities (DACs) in the Westside San Joaquin Region and learn about each community's priorities and funding needs that align with the objectives of the WSJ IRWMP. The development of tailored funding matrices will help DACs be ready for grant and other funding opportunities that align with their needs and priorities.

¹ For the sake of completeness, this includes those Activity Agreements that have been approved by the Board of Directors, but not yet signed by all interested members and/or participants (i.e., the Los Vaqueros Expansion Project Activity Agreement, the Exchange Contractors 2019-2023 Transfer Program Activity Agreement, and the Westside-San Joaquin Integrated Regional Water Management Activity Agreement).

2. Sustainable Groundwater Management Activity (SGMA) Activity Summary

Northern and Central Delta-Mendota Regions

The Northern and Central Management Committees directed staff to continue using Zoom for public participation meetings. Committee members are required to attend meetings in-person for purposes of achieving a quorum and to vote on action items unless other Brown Act provisions are followed.

April 30 was the deadline for collecting Spring Water Level readings across the Subbasin. Collected data must be uploaded to the DWR SGMA portal by the end of June.

General SGMA Activities

GSP groups are waiting for a grant agreement from DWR for \$7.6 million in grant funding awarded to the Subbasin SGMA Round 1 Implementation funding. Received funds will go toward items including implementing groundwater recharge projects, amending Groundwater Sustainability Plans (GSPs), and filling data gaps. Agreements are expected to be finalized in May.

A subcommittee of Delta-Mendota Subbasin representatives continues its series of meetings with DWR SGMA program staff to discuss the incomplete determination given to the Delta-Mendota Subbasin's six GSPs. The 23 GSAs must make necessary changes, approve, and adopt the revised Plans by July 20, 2022.

SLDMWA staff is working with local project sponsors to maximize the use of grant funds from the Proposition 1/68 GSP Development/Implementation Grant. The last day for reimbursement eligible work was April 30, 2022. The final invoice must be submitted by June 30, 2022.

3. Drainage Activity Summary

Grassland Basin Drainage Management Steering Committee Activity Summary

- Review issues with CDFW on the Mud Slough mitigation project.
- Follow through on requests for treatment suppliers on the SJRIP and meeting with Fresno State team on site
- Proceed with development of installation of monitoring wells and other operational requirements for Grassland Bypass Project and prepare for summer invertebrate sampling.
- Coordinate activities with the Grassland Basin Authority for operation of the SJRIP.
- Prepare annual monitoring report update.
- Coordination to address urgent remediation of leak into San Luis Drain.
- Other ongoing activities: Continue to review GBD invoices, prepare annual monitoring reports, support for ongoing litigation and data management and management of the Third Party Group for the Grassland Drainage Area Coalition to implement the Irrigated Lands Regulatory Program. Work includes participation in activities for groundwater protection values.

65

- Prepare for and coordinate May Drainage Authority meeting.
- Review management zone requirements and develop budget estimates.
- Continue management of the Westside San Joaquin River Watershed Coalition to comply with the Irrigated Lands Regulatory Program. Distribute paperwork requirements for 2021 reporting year. Follow up calls and emails were answered to assist farmers in completing their paperwork requirements. Manage field monitoring program and provide update of the management plan to the Regional Board. Review invoices from consultants and prepare letters to admin staff. Continue to update membership database. Prepare for annual grower meetings including district meetings. Enter farmer evaluation and nitrogen summary reports into coalition database.
- Participate in group conference calls regarding surface and groundwater management plans, groundwater protection formulas and the CVSalts prioritization and optimization studies. Participate in Central Valley Groundwater Monitoring Collaborative conference calls. Participate in management practices effectiveness program conference call. Held meetings on Management Zone development. Manage ongoing monitoring. Revise the QAPP for the monitoring program. Prepare monitoring plan update and management plan.
- Management continued for the Prop 84 Real Time Management Program Grant for compliance with the San Joaquin River Salt and Boron TMDL. Preparation of annual real time management program report. Direct in field monitoring station construction activities. The annual report was submitted to the Regional Board.

Nitrate Control Program Management Zones

Parry Klassen
Executive Director
Valley Water Collaborative

Joe McGahan
Dave Cory

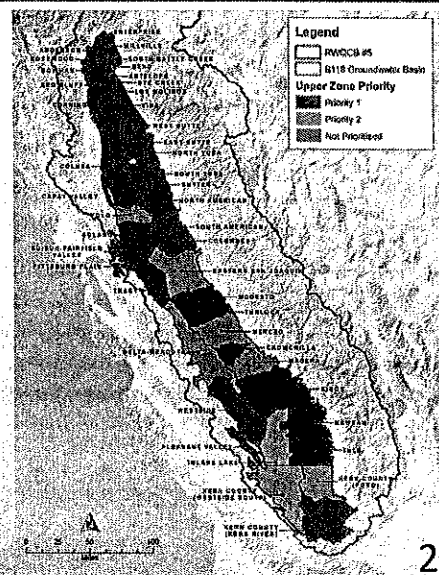

NITRATE CONTROL PROGRAM

New Water Board regulation that addresses nitrate-contaminated groundwater basins and affected drinking water supplies

Three program goals:

1. Provide safe drinking water supplies
2. Reduce nitrate impacts to water supplies; and
3. Restore groundwater quality, where reasonable, feasible and practicable.

68

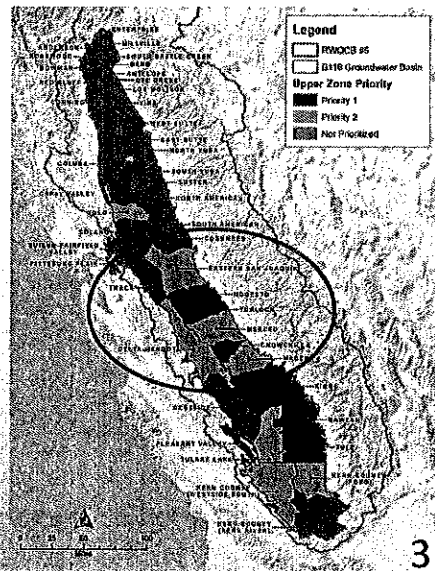

WHAT IS THE NEW NITRATE CONTROL PROGRAM?

Central Valley sub basins divided into three priority levels:

1. Priority 1: Notice to comply May 2020
2. Priority 2: est. Notice to Comply Early 2023
3. Priority 3: no date given for NTC

Valley Water Collaborative was formed to initially encompass Modesto-Turlock Management Zones

<https://www.cvsalinity.org/nitrate-control-program.html>

3

RESPONSE TO NOTICE TO COMPLY – SELECT COMPLIANCE PATHWAY

- Select compliance pathway and prepare required materials for submittal to the Regional Board:
 - Path A – Discharger elects to comply with Nitrate Control Program requirements as an individual entity
 - Path B – Through establishment of a Management Zone, permitted dischargers opt to work collectively to comply with Nitrate Control Program requirements

4

lea

PRELIMINARY MANAGEMENT ZONE PROPOSAL

Preliminary Management Zone Proposal (PMZP) with Early Action Plan (EAP)
Due 6 months after NTC

Key Elements

- ✓ Proposed Management Zone Boundary
- ✓ Identification of participating permitted dischargers
- ✓ Initial assessment of nitrate conditions in groundwater
- ✓ Potentially impacted public water supplies/domestic wells where nitrate exceeds water quality objectives
- ✓ Existing nitrate management practices of participating permitted dischargers
- ✓ **Early Action Plan** to assure safe drinking water in the short-term while long-term solutions developed and implemented

5

VALLEY WATER COLLABORATIVE (VWC)

VALLEY WATER
COLLABORATIVE
www.valleywaterc.org

• Organization Structure

- A non-profit (501-c3), public benefit California corporation, established July 7, 2020
- The corporation's activities and affairs are managed, and all corporate powers are exercised, by or under the direction of the VWC Board of Directors
- Based in Modesto, CA

• Mission

The mission of Valley Water Collaborative is to maintain and improve the quality of life in the northern San Joaquin Valley by implementing programs that provide access to safe drinking water for residents, and by engaging in activities with the goal of protecting or enhancing the quality of groundwater used as drinking water for residents in the region.

6

70

VALLEY WATER COLLABORATIVE
BOARD OF DIRECTORS

12 Board Members

- 3 irrigated agriculture
- 3 food processor/winery
- 2 dairy industry
- 1 poultry
- 3 Cities

7

VALLEY WATER COLLABORATIVE BOARD

• **Board Officers**

- Alan Reynolds, Chair (Gallo Vineyards/ East San Joaquin Water Quality Coalition)
- David Brush, Secretary (Grower/Mid-Valley Agricultural Services/East San Joaquin Water Quality Coalition)
- Ray Prock, Treasurer (Ray-Lin Dairy)

• **Board Members**

- | | |
|--|---|
| - David Belt (California Poultry Federation) | - Art Riddick (Darling Ingredients) |
| - Jeremy Damas (City of Ceres) | - Tom Roduner (Grower/East San Joaquin Water Quality Coalition) |
| - Justin Gioletti (Robert Gioletti and Sons Dairy) | - Antonio Tovar (Salida Sanitary District) |
| - Paul Huckaba (Bronco Wine Company) | - Michael Wood (Hilmar Cheese Company) |
| - Ben Koehler (City of Modesto) | |

8

12

ADVANTAGES OF COLLABORATIVE APPROACH

1. Coordinated nitrate management strategies
2. Reduces duplication of efforts in:
 - a. Administrative management
 - b. Management zone planning with similar hydrology and water needs
 - c. Outreach
3. Provides economies of scales for purchasing water/installing fill stations
4. Optimizes services for ongoing O&M of water deliveries
5. Larger assisted populations can be named when pursuing public grant funds
6. Potential for joint projects to address nitrate impacts, especially where Management Zones are contiguous
7. More efficient use of time for those representing WDR holders and impacted communities

9

ESTIMATE OF EXPENDITURES - 2022

2022 Activities

1. Outreach to stakeholders/dischargers in Sub Basin
2. Gain consensus on approach/joining VWC
3. Establish year 1 funding base

Subtotal					\$ 165,462.00
TOTAL Basin cost					\$ 220,972.00

2023 ACTIVITIES

1. Prepare Preliminary Management Zone Proposal
 - a) Assessment of existing groundwater conditions for nitrate (using currently available data)
 - b) Develop Early Action Plan; Identify potential domestic wells, population information, outreach strategies
2. Draft plan outreach to stakeholders/dischargers in Sub Basin
 - a) Hold meetings to give opportunity for local input to draft plan
 - b) Post information on website
3. Expand MMS/applicant data management system
 - a) Add GIS layers for basin geography, Public Water Systems
 - b) Store Applicant info
 - c) Water delivery tracking
4. Program mailing to well users

73

Groundwater Protection Formula, Values and Targets

Coalitions are continuing to develop a methodology to establish nitrogen loading Targets as required by the WDRs. In July 2022, coalitions must submit to the Regional Board Groundwater Protection Targets for each high vulnerability township within the Central Valley. The methodology will take into account local conditions such as recharge, current groundwater quality and other regionally specific factors. Coalitions are planning to utilize a groundwater model called, the Non-Point Source Assessment Toolbox (NPSAT), to help establish township level Targets.

The coalitions will propose interim targets and longer-term final targets for each township. The township level nitrogen Targets will be compared to the GWP Values produced by the SWAT formula process to determine if growers within that township must implement additional management practices to reduce nitrogen discharges from their farms. It is expected that the formula, value and target methodology will evolve over time.

If a township is not meeting the approved GWP Target, Coalitions will need to amend their Groundwater Quality Management Plan to include new management practices designed to meet the township's GWP Target. If a Coalition has elected to comply with the state's Nitrogen Permitting Strategy through the Management Zone alternative, the Coalition will have significantly more time to meet final GWP Targets.

CV-SALTS

Salt Control Program

Phase I of the Salt Control Program involves the development of a Prioritization and Optimization Study (P&O Study). Work on the P&O Study is being done under the direction of the CV-SALTS executive committee. Currently, consultants are compiling data in order to characterize current salinity conditions of both surface and groundwater across the Central Valley. Phase I of the Salt Control Program is expected to last years.

Nitrate Permitting Strategy

The Central Valley Basin Plan's Nitrate Permitting Strategy divided the Central Valley into Priority 1, Priority 2 and non-Prioritized basins. Priority 1 basins have developed and begun to implement their nitrate programs. The Regional Board is expected to issue notices to comply to Priority 2 basins in early 2023. The Westside San Joaquin Watershed Coalition is in a Priority 2 basin and therefore is expected to receive a Notice to Comply from the Regional Board in 2023. The Westside Coalition is working to develop a plan to help form a Management Zone to comply with the requirements.

Re: SGM Grant Program SGMA Implementation – Round 1 Grant Award Acceptance

Dear Ms. Jochimsen,

On behalf of the Delta-Mendota Subbasin, the Del Puerto Water District is honored to accept the SGMA Implementation – Round 1 Grant in the amount of \$7.6 million. For purposes of ensuring a smooth process as the grant is administered, we offer the following additional confirmations and information:

- The address for all correspondence and reimbursement payments is: P.O. Box 1596, Patterson, CA 95363
- The District consents to electronic signature authorization for all grant related documents requiring signature
- The District consents to the use of DocuSign for all transactions related to this award

Additionally, the District previously submitted the required authorizing Resolution for the grant agreement, and thus believes it has met all of the requirements for executing the grant agreement. If you need any further information, please do not hesitate to contact me directly at (209) 892-4470.

Sincerely,

A handwritten signature in black ink that reads "Anthea G. Hansen".

Anthea G. Hansen
General Manager
