Re: Request to Reschedule 2020 Stored CVP Supply, 2020 YCWA Supply acquired under Article 3F of the District’s CVP Contract, 2020 Acquired Non-Project Water, and 2020 NVRRWP Exchanged/Stored Supply

Dear Ms. James & Mr. Mora:

Based on final meter readings submitted to the District by the San Luis & Delta-Mendota Water Authority for the month of February 2021, the District requests to reschedule an estimated 14,021 AF of its 2020 CVP contract irrigation water supply. In addition, the District requests consideration for the Rescheduling of 49 AF of 2020 DMC stored non-project Groundwater Pump-In Supply, 583 AF of stored 2020 YCWA supply acquired under Article 3F of the District’s CVP Contract, and 1,288 AF of water Exchanged/Stored under the North Valle Regional Recycled Water Program. These various supply types total 15,941 AF of supply, all of which is currently stored in San Luis Reservoir.

In making this request, the District agrees to abide by the forthcoming Guidelines for Rescheduling, as well as the Business Practice Guideline No. 8 for Rescheduled Central Valley Project Water.

Sincerely,

Anthea G. Hansen
General Manager

Re: Request to Re-Prioritize use of 2020 Rescheduled Project Water

Dear Mr. Jackson:

Pursuant to the most recent "Rescheduling Guidelines for the Federal Share of Storage in the San Luis Reservoir, Central Valley Project, California, dated February 6, 2020", rescheduled Project Water shall be the first project water scheduled by and delivered to the contractor as of March 1 of each year **unless otherwise provided for in writing by Reclamation**" (p.1, section titled GENERAL). Later in the Guidelines, there is discussion about "First Water Evacuated", which generally refers to the priority of evacuation of stored supplies due to insufficient storage space in the Federal Share of San Luis Reservoir (p. 3-4, section titled Approval & Scheduling, B.4). Given the current circumstances surrounding the District's water supply situation going into the 2021-22 water year, the District hereby requests written approval by Reclamation of our intention to defer use of 7,910 AF of our 2020 CVP rescheduled project water unless or until the 2021 CVP Ag Service Allocation is increased to 10% or higher.

As you know, South-of-the Delta agricultural water service/repayment contracts have little reliability in their otherwise sufficient contract allocations, primarily due to shortage provisions inherent to the contracts. Given this, it is necessary for contractors such as Del Puerto to always plan not just for the current year, but for one or more years into the future. The various "water accounting procedures" associated with the development of supplemental supplies and ongoing programs often hinder our ability to best serve our customers; specifically things like the "transfer window", storability of certain water types, risk of spill, and the need to show metered use of certain transactions in order to actually perfect them. With only a 5% allocation for the 2021 water year, requiring the District to first use its rescheduled project water before any other supply types will impose unnecessary harm to the District and its growers by limiting our ability to fully utilize any potentially available storage of the highest priority type water in San Luis Reservoir at the end of the 2021-22 water year.

Our intention would be to reserve use of 7,910 AF of our 2020 CVP rescheduled water, which would incur evaporation losses of 1% a month or 899 AF, and result in 7,011 AF of 2020 Rescheduled CVP

56

supply to add to 7,010 AF of our 2021 CVP supply i.e. our entire 5% 2021 allocation, to reschedule into the 2022-23 water year. This action, of course, would not occur if the current years' allocation was increase to 10% or above, or if the District was unable to procure sufficient alternative sources of supply during the year to meet its needs.

We look forward to your timely response to this request. If you have any questions or would like to discuss further, please do not hesitate to contact me at (209) 892-4470.

Sincerely,

Subject: Carriage Water 101

All,

Thank you for your participation of the March 4 Carriage Water 101. Here is a summary table of previous carriage water for: (1) pre-transfer estimate, and (2) post-transfer final value published in DWR Bulletin 132. Please let me know if you have any questions.

Calendar year	Pre-transfer estimate of carriage water	Post-transfer final carriage water published in DWR Bulletin 132
2008	20%	20% (not based on DSM2 modeling)
2009	20%	20% (not based on DSM2 modeling)
2010	20%	20% (not based on DSM2 modeling)
2011	No Transfer	No Transfer
2012	30%	30%
2013	30%	30%
2014	30%	20%
2015	30%	20%
2016	20%	30%
2017	No Transfer	No Transfer
2018	35%	35%
2019	No Transfer	No Transfer
2020	35%	30% (to be published)
